UNLEASH YOUR CREATIVITY

Definition of Creativity

"Creativity is...seeing something that doesn't exist already. You need to find out how you can bring it into being, and that way be a playmate with God." -- Michele Shea

According to Webster's Dictionary, the definition of creativity is artistic or intellectual inventiveness. Creativity is marked by the ability or power to create or bring into existence, to invest with a new form, to produce through imaginative skill, to make or bring into existence something new. When you create something, you are actually bringing it into being, making it from nothing. But how do you make something from nothing? How do you achieve creativity? What is the essence of creativity?

Perhaps only magic can explain creativity, that sudden "aha!" moment when it all comes together. Some have said that it's something mysterious and puzzling, perhaps impossible to figure out. Some have said it must be divine inspiration. Creativity is simply thinking the impossible, and then doing what no one else has done before, sometimes developing completely new worlds. If you've taken a new approach to a problem and it works, then you're using your creativity.

Creativity comes in many forms. It can be scientific creativity, resulting in inventions or medical cures. It can be artistic or musical, resulting in beautiful paintings, sculptures or operas and songs. It can be creative writing, resulting in novels, short stories and poems. Creativity can even be as simple as arts and crafts, such as needle arts, yarn crafts, and woodcrafts - things you create with your own two hands.

The important thing to remember is that creativity includes generating the idea or concept, as well as applying that idea and producing or manifesting the end product or result. Creativity or imagination is an integral part of being human and separates us from the animal world. Carl R. Rogers said, "The very essence of the creative is its novelty, and hence we have no standard by which to judge it."

One Final Word

Painting 101

People have been expressing themselves through painting for thousands of years. Even the cavemen showed great hunts or other events with paints made from berries and plants. There just seems to be an innate need to show others our thoughts, feelings, and ideas through pictures. The phrase “A picture is worth a thousand words” is so very true.

With colors and design you can express every emotion you feel. Whether it is a woman in a garden waiting for her lover or an old barn set in a field of wild flowers, the subject bring memories and feelings to the fore front of the viewer's mind. All of this being accomplished on a blank canvas with paint.

There are some basics the beginning artist should know. Although you may have been sketching and drawing for years, the first time you pick up a brush it will seem foreign to you. This is fine. You will become very familiar with each of the brushes and the strokes they can make. They will soon be as comfortable in your hand as the charcoal pencil you use on the sketch pad.

Paints can add style and creativity to an art piece. A single tear drop on the face can take on a totally new dimension by adding color. Paints allow you to do this with ease. The types of paint you use will also allow you to be more creative.

Many artists use the oil paints for extend projects. The oils do not dry as quickly and can be rejuvenated with a little turpentine or mineral spirits. This allows the artist to continue the project another day. The brushes you use with an oil painting must be cleaned extremely well. If you allow them to sit in the cleaning solution they can loose their shape. This means you may not be able to use certain brushes to achieve a particular brush stroke.

When the artist uses acrylic paints, the dry time is extremely fast. Many times, a project which is being done in half an hour or so will be done with acrylic paints because of the ease of use. Clean up with soap and water is a quick task. The brushes wash up quickly and cleanly. Allowing them to dry either on a flat surface or standing with bristles up will keep their original shape.

Great Art Can Change Us

Art and art appreciation is usually categorized as entertainment primarily because it is something we do with our free time. Unless you are an artist, gallery owner, agent or dealer, art is probably not your profession so you participate in your enjoyment of fine art when you can away from work.

But there is something unique about fine art that is different from other forms of entertainment. More so than bowling or playing cards or even camping or skiing, great art can make changes to us at a fundamental level and make us more mature and reflective people.

Art appreciation is an acquired taste. To be able to enjoy fine art, one must go through a period of acclimation and growth as a person. To someone who does not know how to enjoy fine art, the sight of an art lover standing for an hour in front of a great painting, unmoving seems virtually absurd. They cannot understand that even though the art lover is still and the art work is not moving, there is a hurricane of emotion, passion and communication between the art lover, the art work and the artist all taking place that cannot be seen with the eyes.

Artists share some characteristics with poets, playwrights and even evangelists because they often are burning with a message to pass along to mankind. And because art is their language and way of talking to us, that artist pours his soul into an artwork to reach you and I when we come upon that artwork and “unlock” the meaning and hear the message the artist has to say.

In that way, great art can communicate philosophical, ethical, moral, political, poetic or religious ideas just as loudly as any speaker presenting a convincing diatribe from a pulpit. The language of the artist is the image and the stirring emotions those images provoke. But those images can change how we view the world and how we understand the deeper idea that the artist wanted us to ponder with him or her in ways that could never be communicated any other way.
