ATTRACT ABUNDANCE IN YOUR LIFE

HOW TO FILL YOUR LIFE WITH UNLIMITED ABUNDANCE

Introduction

"Abundance is not something we acquire. It is something we tune into." -
Dr. Wayne Dyer

According to Webster's Dictionary, Abundance can mean a profusion, an affluence, wealth, a relative degree of plentifulness or a fullness to overflowing.

Some might think of money or possessions when considering abundance. It can actually mean different things to different people, and can apply to many different aspects of life.

Everyone has the possibility of abundance in them, whether they realize it or not. According to Eileen Caddy, "Expect your every need to be met. Expect the answer to every problem, expect abundance on every level."

A lot has to do with how you attract the abundance in your life, not just money and possessions, but also people, relationships, and jobs. How you feel about what and whom you already have in your life has a great deal to do with the abundance you find yourself enjoying. According to Anthony Robbins, "It's not what we get, but who we become, what we contribute...that gives meaning to life."

Abundance, like success, is not a destination, but rather a journey; and up until now, there has been no map to guide you, no manual available to tell you how you're doing.

Chapter 1: Financial Abundance **The Abundant Universe**

"There is only one success—to spend your life in your own way," -
Christopher Morley

Does it ever feel like you just never seem to get ahead? Do you ask yourself why you still seem to come up with nothing, even when you work so hard? Does it seem like you're always struggling just to get by? Even when you receive your weekly pay, the anxiety doesn't go away, and you're still left feeling frustrated and scared.

SUMMARY

UNDERSTANDING THE UNIVERSAL LAWS SO YOU CAN MAKE THEM WORK FOR YOU

INTRODUCTION

In life, there are universal laws that govern everything we do. And these universal laws never err, not even once. These laws are so perfect that if you were to align yourself with them, you could have so much prosperity that it would be coming out of your ears.

We all know the laws exist, but we really don't know much about them. We don't know what they are so we can get in tune with them. So we have to know what the universal laws are first, then everything else follows.

The first thing to consider when you try understanding the universe is to know who created the universe. Once you know this and why the universe exists, you'll gain a better idea as to why the universe is so powerful.

Now it depends on your belief system and what you were brought up to accept, because the creation of the universe was talked about in schools as having started with the Big Bang theory. This is where an explosion occurred and suddenly the universe appeared. Many scientists believe this theory because it is the easiest way to understand it. What they fail to understand or give credence to is who created the explosion to begin with. That mass of material that exploded didn't just appear there by itself. It had to have been created. This is why, no matter your religious beliefs, you must know that God is the one who created the universe for our use and to get whatever we want from it.

This God or Infinite Being as some prefer to call him creates everything in the universe in the image and likeness of himself. This is why the universe is perfect. This is why it is powerful and dynamic. In order for everything to function in this capacity, God created laws that would automatically serve the purpose for what it was intended.

Whatever man wanted to do, if they worked in connection with these laws, would find plenty of abundance and perfection abounding, despite being sinful creatures themselves. The sin of humanity is not what fails in the person's life. It is failure to follow the universal laws that causes one to fail.

The laws that were created consist of the following:

HOW TO YOU CAN MAKE THIS HAPPEN AND
HOW TO BE PREPARED FOR IT WHEN IT DOES

INTRODUCTION

A few years ago, I was strolling by the seacoast to get some fresh air. It was almost six in the afternoon on a hot humid day. Between where I am and the sunset, there were rows of yachts all over. I realized I was near a yacht club. Admiring the yachts, I said to myself: "Sure must be fun to own a yacht like that" as my attention was focused at one of the yachts which was strikingly more sophisticated than the others. I have always been fascinated by boats ever since I was a kid though owning one never really occurred to me. Again, I said to myself: "Only the rich can afford it."

Although the thought of getting rich crossed my mind, I never took it seriously at first. But somehow, I began to wonder if it's really possible for a nobody like me to become a millionaire someday. Something inside me told me to dig deeper, to know more about acquiring or creating wealth even if it seemed unattainable. I've heard of true stories about self-made millionaires. I've heard of stories about people who started from scratch and turned it into millions. So I asked myself: "If others can do it, why can't I?"

Another reason (and probably the main reason) that prompted me to dig deeper was the thought of being an employee all my life, working from nine to five, seemed to get me nowhere. This led me to ask myself: "What's life going to be financially when I retire?" followed by a remark: "I have to do something about this."

That was almost five years ago and I'm glad I talked myself into doing something that will change my life, and change it did. I still don't own a yacht, attending to my other priorities first. But I'm well on my way to owning even a small one.

I'm even more glad that you've decided to take a look at this book. It's my turn to share with you what I have learned during those five years and I am confident that the contents you will find within this book will benefit and change your life as it did mine.

I believe that if more people could learn ways to improve their lives through helping each other, the world will be a better place to live in. The time will come when those being helped are the ones who will be helping those who have helped them before (reciprocation of favors, which is advantageous to all concerned).

THE LAW OF ATTRACTION

WHAT IT IS AND HOW IT CAN WORK FOR YOU

The Law of Attraction: Getting Everything You Want Out of Life Through the Power of Your Own Mind. And Let Your Thoughts Determine Your Destiny

Imagine for a moment that you have in your possession a source of complete and total power. You alone can command the warmth of the sun, the fall of the rain, the turn of the tides and the direction of the winds. What would you do with this kind of power? Would you abuse it causing the world to fall into utter chaos? Would you be benevolent and merciful, using your power to help the people of your planet achieve their ultimate potential?

Unfortunately (or fortunately, as the case may be) there is no way for a person to have that much power. Mother Nature controls the planetary systems according to her own rules and her own designs. You will never be able to have utter control over the environment you are inhabiting.

What if you could, however, have the power to determine the course of your own life? What if you could accomplish great things and acquire great riches just by using the power of your own mind? What if I told you that this does not have to be a “what if?” What if I told you that you possess in your psyche the power to chart the course of the rest of your life on whatever path you see fit?

Chances are you would tell me that I had obviously been watching too much Sci-Fi and needed to get out of the house more often, not to mention my obvious need to expand my vocabulary, considering the number of times I have used “what if” in this conversation. You would be wrong (about the Sci-Fi, anyway). Every person holds in their mind the power to shape the events of their life to achieve whatever end they see fit. This power is what is known as the law of attraction.

Google Images

What is the Law of Attraction?

The belief held by many theorists is that the universe is governed by a set of universal laws; these laws cannot be changed, cannot be broken and apply to every individual, regardless of age or nationality. These laws are the riverbanks which guide the flow of their lives on its journey to its ultimate end.

QUALITY # 12:

A Leader Should Be Able to Develop Other Leaders.

CONCLUSION

BORN TO LEAD AND SUCCEED

UNLEASH THE LEADERSHIP QUALITIES WITHIN YOU!

INTRODUCTION

You have what it takes. You know you are the most suited person for the job. You're so positive that you can lead a lot of people towards good business...Or so you think. Because if you really are, then why did John, from the other department, got the job you've been dying to have since you entered the company?

Leadership is more than just being confident that you can manage a number of people and make them follow your lead. Each one of us influences at least ten thousand other people during our lifetime. Hence, the question is not whether we can influence these people, but in what manner shall we influence them.

There are instances that competitors suddenly give up believing that they just can never be leaders. *Maybe I'm not really born to lead*, they think. On the contrary, the key to effective leadership does not depend primarily in the abilities we are born with, but in techniques, skills, character, and qualities that we are open to develop throughout life.

Leadership does not come out merely from the inner personality of the individual or from his philosophy of leadership, but from his enthusiasm to become the person other people will follow. This means that how a leader reacts when his power or safety is challenged, and how he interprets the world around him, is crucial to developing strong and effective leadership qualities.

It is true that there is always room for improvement for every one of us. David Rooke, partner at Harthill Consulting and co-author of the Harvard Business Review article *Leadership Can Be Learnt*, said that there is room for us all to develop and maximize our leadership capabilities.

"The lessons for businesses to learn lie in their willingness to make leadership development a central pillar in the way they operate and a powerful force for transforming their fortunes," he said.

So to future leaders of the world, worry no more. This report is designed to help you develop the winning leadership qualities you have been lacking of and increase your personal and organizational success. Whether your desire is to lead a student campaign, start a business, or reach the top of the world, the first step in achieving it is to know what it takes to be a leader...and a winner in one.

SUMMARY

PROGRAM YOUR MIND TO SUCCEED

HOW TO FOCUS YOUR THOUGHTS ON ATTRACTION

INTRODUCTION

Every action starts with a thought. This is what guides us and helps us deal with life on its own terms. When we have to make decisions we use our faculty of the brain to think and reason about what we are facing so we can come to some positive conclusion that is most beneficial to ourselves and hopefully to those around us. It doesn't matter what our station in life may be, we all use the same avenue that allows us to make decisions by what we experience, see or hear. If we think bad thoughts, bad things happen to us. If we think good thoughts, good things happen to us.

This way of thinking we believe comes from our consciousness. It dictates the way we think and reason about what has happened in our life and has a direct influence on the outcome of whatever problem or issue we happen to face. This conscious level controls how we discern our surroundings at any given time. But did you know that the conscious level of the mind is only involved in what we perceive? That's right. The conscious level only takes in what the eyeballs and ears take in and initially deposit that information. However, the process does not end there, for another step is involved.

There is another level of the brain that has more control over our thoughts than the conscious level does. This is the subconscious. The subconscious is what really processes our thoughts that come into our conscious mind. The subconscious mind takes those thoughts and processes them for us to act on. The final process is delivered to our conscious mind in the form of feedback that we interpret as our thoughts. These thoughts also direct our emotions. As you can see the thought process is very powerful.

When these thoughts come to our conscious mind, they may or may not be in harmony with our programming - programming that was ingrained into us when we were little ones. This is programming we received starting at the day of our birth. And so we may reject some thoughts because of our limited beliefs.

But what exactly is the subconscious mind? You can think of the subconscious mind as something like a computer. When you first purchase a computer you have the hardware that allows it to function the way it was intended. You have the box the CPU is stored in, the monitor, keyboard, mouse, CD or DVD drive, and hard drive. Everything is there and in place. There is one problem, though. Without the operating system that computer is worthless. The operating
